Frontend Developer

CAREER OBJECTIVE

Dynamic UI/UX and Web Developer combining programming proficiency in HTML, CSS, and JavaScript. Skilled in end-to-end web pages development using front-end technologies (HTML, CSS, JavaScript and React). Detail-oriented problem solver, committed to delivering high-quality projects within deadlines. Continuous learner, staying ahead of industry trends in web development.

EDUCATION

B.Tech. in Computer Science and Engineering,

Lovely Professional University, Phagwara, IN.

(Jul'20 – May'24)

63%

Higher Secondary, Patna Central School, Patna, IN.

76%.

(Mar '19 - Mar '20)

Matriculation, Patna Central School, Patna, IN.

91.2%.

(Mar '16 - Mar '17)

CERTIFICATIONS

Created Charts and Dashboards Using Microsoft Excel through a Coursera course

Oct 2022.

Obtained Introduction to R Certification from Data camp

Feb 2023.

Completed Data Visualization with Tableau course on Coursera

Apr 2023.

Successfully completed R Programming course on Coursera

Apr 2023.

PROJECTS

Amazon Webpage Clone

29'June 2023

- Recreated the Amazon webpage using HTML and CSS.
- Demonstrated proficiency in front-end web development.
- Implemented a responsive design, navigation bar, search functionality, and styled various sections of the webpage.
- Successfully replicated the complex layout and styling of the original Amazon webpage by breaking it down into smaller sections and progressively building the clone.
- Styled various sections of the webpage, including product listings, recommendations, and a footer.

The Time Game

22'Aug 2023

- **Game Concept:** Created a web-based game with four sections: Hit (displays a random number), Timer (counts down from 60 seconds), Score (tracks the player's score), and Body (where the player clicks numbers to match the Hit).
- **Technologies Used:** HTML for structure, CSS for styling, and JavaScript for interactivity.
- **Game Mechanics:** Start the game, and a 60-second timer begins counting down. Random numbers appear in the Hit section. Player clicks numbers in the Body section to match the Hit number. If the clicked number is correct, the player's score increases by 10. The game ends when the timer reaches 0.

CRUD Application

18'July 2024

I developed a Management System using React.js with key features like CRUD operations for managing student details, dynamic routing with React Router, and secure login/signup functionality. The project includes a Home page, Student Details page, and Faculty page, Technologies used: React.js, JavaScript, HTML, CSS, and RESTful APIs. This project highlights my ability to create robust, user-friendly web applications and my commitment to high-quality, timely project delivery.

TECHNICAL SKILLS

HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap, Figma

DEVELOPER TOOLS – GitHub, VS Code.

LANGUAGES

English - proficient

Hindi – Native/Conversational
